

# HTML

## Page Title

# Title (1)

---

- To add a title to your page, change your code so that it looks like this:

```
<html>
```

```
<head>
```

```
<title>My first web page</title>
```

```
</head>
```

```
<body>
```

```
This is my first web page
```

```
</body>
```

```
</html>
```

## Title (2)

---

- We have added two new elements here, that start with the head tag and the title tag (and see how both of these close).

- The head element

(that which starts with the `<head>` opening tag and ends with the `</head>` closing tag)

appears before the body element (starting with `<body>` and ending with `</body>`) and contains information **about** the page.

The information in the head element does not appear in the browser window
