Tables

Tables

- The [table](#) element defines the table.
- The [tr](#) element defines a table **row**.
- The [td](#) element defines a **data cell**. These must be enclosed in [tr](#) tags
- If you imagine a 3x4 table, which is 12 cells, there should be four [tr](#) elements to define the rows and three [td](#) elements within each of the rows, making a total of 12 [td](#) elements.
