HTML
Lists

List

- There are three types of list; **unordered lists**, **ordered lists** and definition lists. We will look at the first two here

- The ul tag is used to define unordered lists and the ol tag is used to define ordered lists. Inside the lists, the li tag is used to define each list item.

Unordered List

<ul>

** the first item
**

** the second item
**

** the third item. **

**
**

- The first item
- The second item
- The third item

Ordered List

<ol>

** the first item
**

** the second item
**

** the third item. **

**
**

1. The first item
2. The second item
3. The third item
