# Project

# Introduction to Web

**Create website project that includes the following requirements:**

1- Five pages.
2- Covers HTML and CSS content as you study in sections.
3- You must navigate between pages.

**You can take the following project ideas as a reference:**

- **Hotel System**

- **Tourism Company**

- **Restaurant System**

- **Clothes shop**

- **Book shop**

- **Construction company**

- **Pharmacy System**

- **Surgery clinic**

- **Travel Agency Booking**

- **Beauty salon**

- **Covid-19**

**Project description:**

Design a website consists of five pages related together using HTML and Css. Each page of this site should have three parts [header, body, footer].

There are constants should applied on pages as Navigation bar consists of [Home, Services, About, Contact us, Login]; Navigation bar should dragged in all pages.

The following description must dragged in your site as basic you can add more; In Home Page; In its body you drag images as image gallery to show what in your site, and display features as you studied in the course along this semester as images, tables, lists, drop down list, and so on ....also apply css effects on that whatever your site.

In service page; you talk about what your site offer to users using paragraph, images, links and drag video.

In page About; you write a paragraph to know anyone what's your site and what about for it.

In login page; create form for user to create an account in this site as :First Name, Last Name, Mobile Num, Email, Gender and so on also you drag a submit button to navigate to home page after login.

In Contact us page; tell user how to contact with you if he/she wants to ask about anything in site or let a comment for his/her opinion for your site.

Your footer in site just create a simple design as pictures for social media of your site and make copyright for it.

Important note: Your site must include all features you studied in this semester and all effects of Css as Animation, transition, image gallery, margin, borders, padding, shadow,......and so on; all features you studied.

Finally create a report using Microsoft word to explain your site and what it included...

**Note that:**

For Centers (Alex, Assuit and Sohag):

Team members: 4-5

For other centers:

Team members: 3-4

Grade:

5 for discussion.
